

1. Hard Disk Drives

NUUO recommends system designers to choose Enterprise grade or Surveillance grade HDDs to ensure high storage stability and performance. 24/7 operational capabilities are also important because your system is running around the clock. This is especially true for environments under the 3 conditions as listed below:

1. When the number of HDDs is more than, or equal to, 5 HDDs.
2. When the NVR is installed on rack.
3. When the NVR is set up with RAID.

Green series hard drives should never be used with NUUO recorders to avoid data lost due to long wake up time from a sleeping drive.
