Wireless Arming Station

Features and Specifications

Prox Tag and User Code

The Wireless Arming Station incorporates a prox tag reader and keypad allowing the user to set & unset via a user inputted codes or a prox tag.

Entry and Exit Tones

Entry & exit tones from the Enforcer Control Panel can be mimicked on the wireless arming station. Ideal for installation near another entry or exit point within the house away from the main control panel.

User Defined Outputs

You can activate the first four outputs from your Enforcer 32-WE, such as lights, cameras, electronic gates on the Wireless Arming Station.

One Push To Learn

The one-push-to-learn feature in all Enforcer wireless devices means that learning devices onto the system can be done in seconds.

No Wires, No Fuss

As the arming station is fully wireless, there is no need to run wiring. Saving you time and money.

Backlit Keys

For ease of use when entering a darkened room, the backlit keypad can enable the system to be set or unset with ease.

Two Way Wireless

Enforcer two-way wireless technology offers a highly secure and reliable wireless system, using 128 bit wireless protocol encryption and advanced jamming detection.

Preserve Battery Power

Instant two-way device control enables immediate wake-up and sleep of devices; preserving battery power, while maintaining a highly secure system.
